

## CHS Library rolls out E-R training for users

The College of Health Sciences Library has rolled out a two-week intensive training on access and use of E-resources to its users between 12<sup>th</sup> and 27<sup>th</sup> May, 2016.

All users are encouraged to take advantage of this opportunity and interact freely with the library staff.

This can be either on one-on-one basis or as a group. More than 100 users have already been trained in the last four days.
